3RD MARCH 2020,

Dear Sir/Madam,

RE: RECOMMENDATION LETTER – GENIUS BUSINESS SYSTEMS

We are a Trading company based in Mombasa with a branch in Nairobi. Our Business operations are Importing & selling Truck windscreens and Trucks & Trailers Spare Parts & Accessories.

We were running on QuickBooks system when we realized that we required a system to centralize our processes dealing with stocks, sales, purchases and account.

Towards the end of 2019, we approached Genius Business System for a fully fledged software and that is when the project for MarsTrack ERP implementation began.

The dedicated team of GBS Africa used their approach to kick off the project in December and worked very hard to ensure our data was in place and training done in the required time. By beginning of January, we successfully started using the system.

The MarsTrack ERP system has fully automated our business making all operations easier. We now have detailed track of our purchases, sales, stock movements, inter-branch transfers and our financial movements. The financial and stock reports play a vital role in our company decision making.

We as a company, would highly recommend GBS Africa to any trading company that wants to automate its business in the best way.

Yours Faithfully,

Ayaaz Salyani
General Manager
