Dear Sir/Madam,

**RE: LETTER OF APPRECIATION**

To: Whoever it may concern:

Genius Business Systems is a company we have known and worked with over the past 5 years. The MarsTrack ERP software has been deployed in our head office of Autometrix in Nairobi Industrial Area. The system provided by GBS Africa has fully integrated our Workshop, Stocks and Sales into one system.

All our processes and business operations have fully been automated. The best part about the system is that it helps us to keep track of each job done by our mechanics and also the relevant reports associated with the jobs.

Over the years we have partnered with GBS Africa, their support has been personalized and there has been a consistency in dedication towards excellence in service provision. We are confident that the same professionalism will be maintained and quality business solutions will be provided to us in years to come.

**This letter of appreciation has been just given base on our experience with GBS Africa. It is not intended with any financial & others security.**

Best regards

For Autometrix Ltd

Director
