4th May 2020,

Dear Sir/Madam,

RE: LETTER OF RECOMMENDATION

Rama Homes Ltd is a real estate company based in Nairobi. Since 2019, we have been looking for an ERP system and we did approach multiple software companies like Oracle, SAP and Sage.

However, these tools were too expensive to provide us with the business solutions we needed and we were looking for a Kenyan Software company who would provide us with what we required. We kicked off the ERP implementation project early 2020 and we have successfully been taken live on MarsTrack ERP system.

We are extremely satisfied as the software provided has taken care of all our needs in regards to our financials, sub-contracting processes, and CRM automation. We get all the reports a real estate company needs.

The support being provided by GBS Africa is extremely professional and personalized. Their team is always dedicated towards providing us with first class service.

We highly recommend GBS Africa as a software provider to any company in the market because of their personalized solutions, efficient support and their ability to quickly understand our business process.

Yours Faithfully,

Rama Homes
