

9th August 2019

Dear Sir/Madam,

RE: GENIUS BUSINESS SYSTEMS

We confirm that since 2009 we have worked cordially with Genius Business Systems on their product MarsTrack ERP.

We are using their system for Inventory Management, Workshop and Financial operations across all our branches and are satisfied with their performance. They do an excellent job, provide quality customer support, and offer competitive rates in town.

Their terms are flexible and they always do exactly what we ask of them. They have always been able to customize the system to our requirements as and when we need.

Our workshop and inventory workflows adapt to International standards of operation. The product is fully integrated and can suit any organization requiring to adapt professional workflows with security in place.

I am happy to recommend the services of Genius Business Systems.

Yours Sincerely,

Mr. ROBERT M.G COLLINGE
