LETTER OF RECOMMENDATION

SGC Investments Ltd is an Oil Marketing Company with a Logistics and Supply chain Division with its headquarters in Zambia, Ndola. Our distribution network covers Zambia, Congo and Tanzania with 30 fuel stations across the region. Transport and Fleet Operations efficiency and timely delivery of Cargo to the required destinations has been our key challenge and requirement.

We needed a system which will keep track of the turnaround time of every delivery, manage our Fleet costs which entails Fuel, Mileages, Spares and Tyres.

A basic accounting system could not resolve our problem and we were on the look out of a service provider to solve our existing issues, be part of the overhaul in terms of project Management and continuous improvement after the rollout.

Genius Business Systems, CEO, Mr. Siddique and his team delivered the Mars Track Business Solution in 3 months which gave us the confidence to add more modules such as Integrating Fleet Tracking system and we intend to continue the journey travelled so far.

We believe that systems are always going to evolve and initial planning is key to having a scalable system. We know what we want to achieve in years to come and we feel GBS Africa is the right partner to work with.

We do recommend Genius Business System for their hard work, knowledge and quick understanding of business process flows to any organization which needs to automate their business processes.

Yours faithfully

SGC INVESTMENTS LTD
